SERVICE BULLETIN # L&T-CC-001/2007

DATE RELEASED: 3/29/07

RIDE MANUFACTURER:	L&T SYSTEMS SRL
RIDE NAME:	FAMILY/COMPACT COASTER 36 X14
AFFECTED SERIAL NUMBER:	FC 4

Dear customer.

We reviewed the record of the last 5 years, and so far no problems were found on the cars of the compact coaster series.

We decide there fore to change the NDT requirement son the cars as follows:

You need to perform NDT tests on one car and 1 car coupling every year, instead of all cars as written in the maintenance manual.
However, should the NDT disclose a problem in one car or coupling, you will need to NDT all the remaining cars also.

We are in the process of modifying all the manual pages related to these changes, and new pages will be send you within 10 days to update your manual; meanwhile, you are authorized to operate if you did perform a 1 car and car coupling NDT test without finding any problem.

Sincerely

L&T Systems srl
