## SERVICE BULLETIN

RIDE NAME: FAR FABBRI srl RANGER AMUSEMENT PARK.  
A.K.A. – Kamikaze, Sky Flyer, Hammer, Sky Fire,  
TYPE: ALL VERSIONS (PARK-TRAILER AND SEMITRAILER VERSIONS).  
MODEL: 11.000  
FINAL INSTRUCTION: MANDATORY  
DATE OF ISSUE: 28/09/2010

Global Amusement Services, (GAS) the authorized service representative for all Fabbri group companies requires that all models of the above mentioned rides and any version not listed must replace the two (2) Basil Bearings (and the 2 relative pinions and the all fixing bolts) after **twenty years** from the date of delivery. These bearings also known as Slew Ring Bearings are located at the central hub and allow the rotation of the arms.

GAS will allow a six (6) months grace period after the original delivery date to have the new bearings installed but no additional time will be given.

The bearing manufacturer Rothe, recommended this procedure at the ten (10) year mark, **but is now requiring at the twentieth (20).**

The compliance date is 20 years from the original factory ship date of the ride, regardless of when the ride was purchased, or who the current owner is.

These bearings will take time to deliver and a deposit is required to place the order.
